Amber's proprietary refurbishment and re-assembly processes assures that all of the necessary FDA recalls, FDA warning letters, FDA safety reports, electrical, mechanical, and cosmetic upgrades are installed to meet OEM performance specifications and like new operation. Our fully refurbished systems look and operate like new, because we rigorously test each system in our facility before it is delivered. All of our refurbished and re-assembled systems are carefully stage tested, calibrated to OEM performance specifications, FDA laws and guaranteed to deliver performance and safety features that meet or exceed original manufacturer's specifications.

Every refurbished system offered by Amber Diagnostics is available with a comprehensive warranty program. All systems are refurbished and re-assembled, bay tested using OEM performance specifications and FDA law, delivered and installed by Amber Diagnostics' engineers insuring our clients quality and consistency while staying within their given budget.

We understand that the recent DRA & Radiology Reimbursements Reductions have caused our clients to spend more time scrutinizing their capital equipment purchases and their practice in it's entirety. When considering the purchase or reallocation of an existing medical asset which is restored back to its original quality level and original manufactures specifications can prove extremely cost effective.

Since 1994 Amber Diagnostics has been providing quality refurbished and re-assembled radiology & diagnostic equipment **saving our clients nearly 75% compared to new equipment.** Call **1.888.561.7900** or visit us online to discover the cost-effective quality solutions Amber Diagnostics can provide for your medical imaging needs. Our expert staff will partner with you to determine the best services, products and site planning for your facility.
